Note: I think a good routine for the middle miles of a 50 miler (where the course is flat and I want to average about 12:00/mile) would be:

1. Walk 0.15 miles at the beginning of each ½ mile and then run the remaining 0.35 miles.
2. If I want to average about 12:00/mile, the walking pace should be close 14:45/mile and the running pace should be close to 10:45/mile.
3. Check the above: $0.15 \times 14.75 + 0.35 \times 10.75 = 6$ minutes. i.e. 6 minutes per ½ mile
