Sun Jan 7, 2018 **5.5 miles**

I ran on a treadmill at the Vernon YMCA.

I ran 5 miles in 44:46 or 8:57/mile. For the first 2 miles the incline was set at 1.5 and at 0 for the remainder of the run. Qualitatively, an incline setting of 1.5 made an actual pace of 9:00/mile feel like about an 8:15/mile effort. Having the incline at 1.5 caused me to land more toward the front of my feet and this made me feel like I was running more smoothly. I wasn't hitting hard on the treadmill and this was making less noise. It felt good. When I set the incline at 0, I continued to land more toward the front of my feet. I haven't been running in this way lately but I may try this for a while.

Mile splits: 10:00, 9:00, 9:00, 8:58, $(4:01 + 3:47) = 7:48$
